Installation Guide

Step One:
1. Make sure the surface of wall flat and clean.
2. If the wall already covered with skin coar, pls repaint a coat of interior latex or primer onto it.

Step Two:
1. Square off the wall according to the size of panels.

Step Three:
1. Hot melt glue and silicone is necessary.
2. Squeeze glue onto each panel.
3. Hot melt glue is rapidly setting. Silicone has the effect of strengthening and consolidation.

Step Four:
1. Install panels in turn from center of wall to around. ↗
2. When fixing panels, pls press panel against wall for 10 to 20 seconds.
